

Grand piano

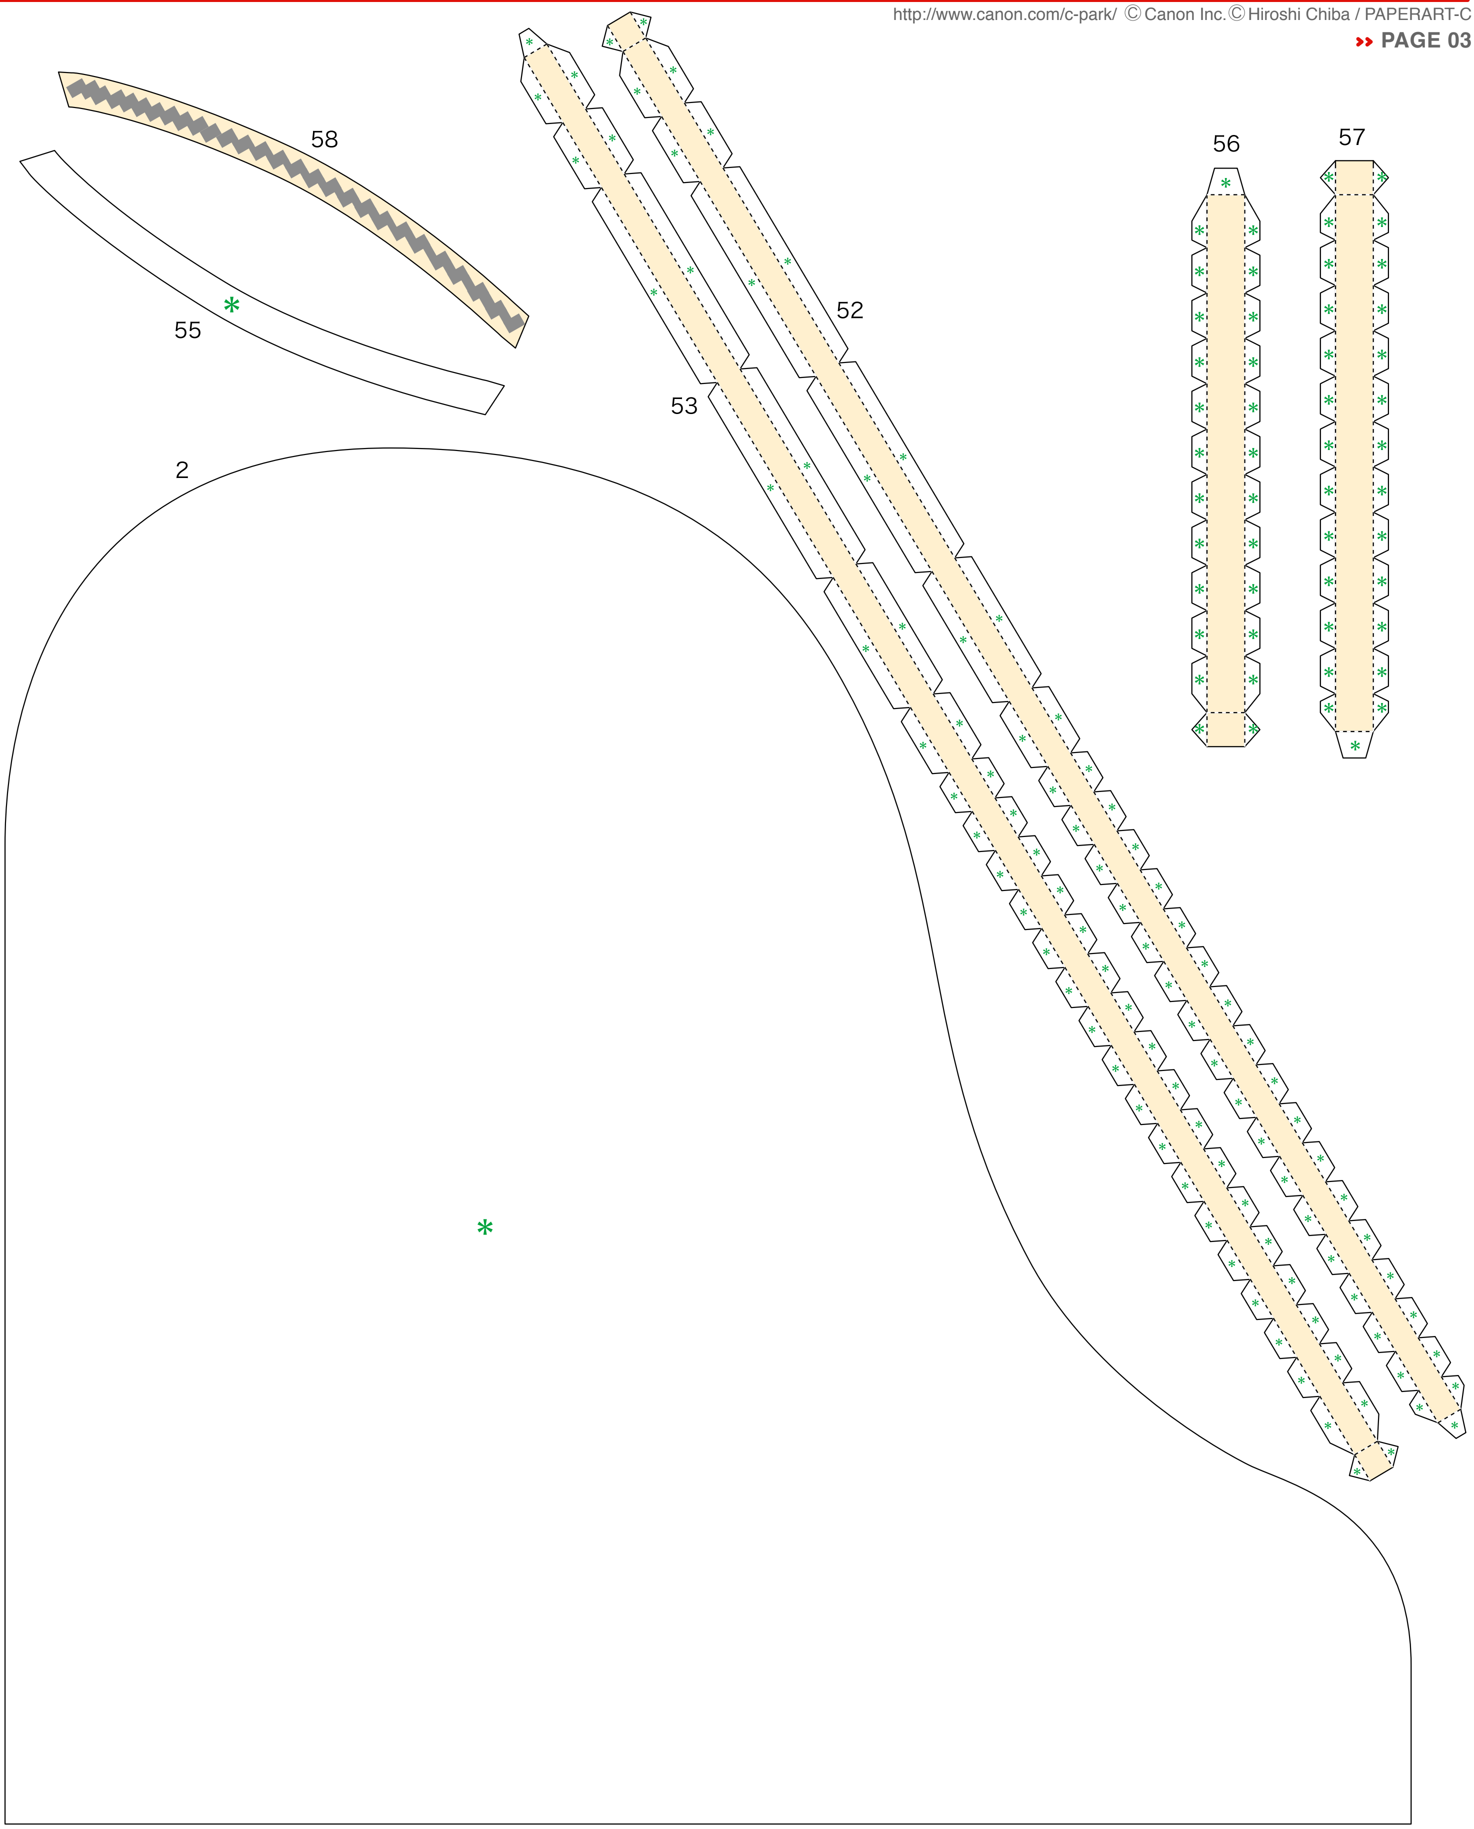

A piano is a keyboard instrument that makes musical sounds through pressing of keys which cause hammers to strike strings. A standard-sized piano has 88 keys and is capable of playing a very broad range of notes. It is unclear when the first piano was created, but we know that pianos were around already in 1700. The grand piano, on which this paper craft is based, has undergone several changes to aspects such as the tightness and shape of its strings, having many improvements carried out over a long time and resulting in the shape it has today. The grand piano is a particularly large type of piano. Longer strings make for a better resonation, and so the grand piano has its frame parallel to the floor, allowing for a large space to house long strings. These long strings also mean that it is very large in size, making the grand piano perfect for use in big concert halls with high ceilings, or other areas with good acoustics.

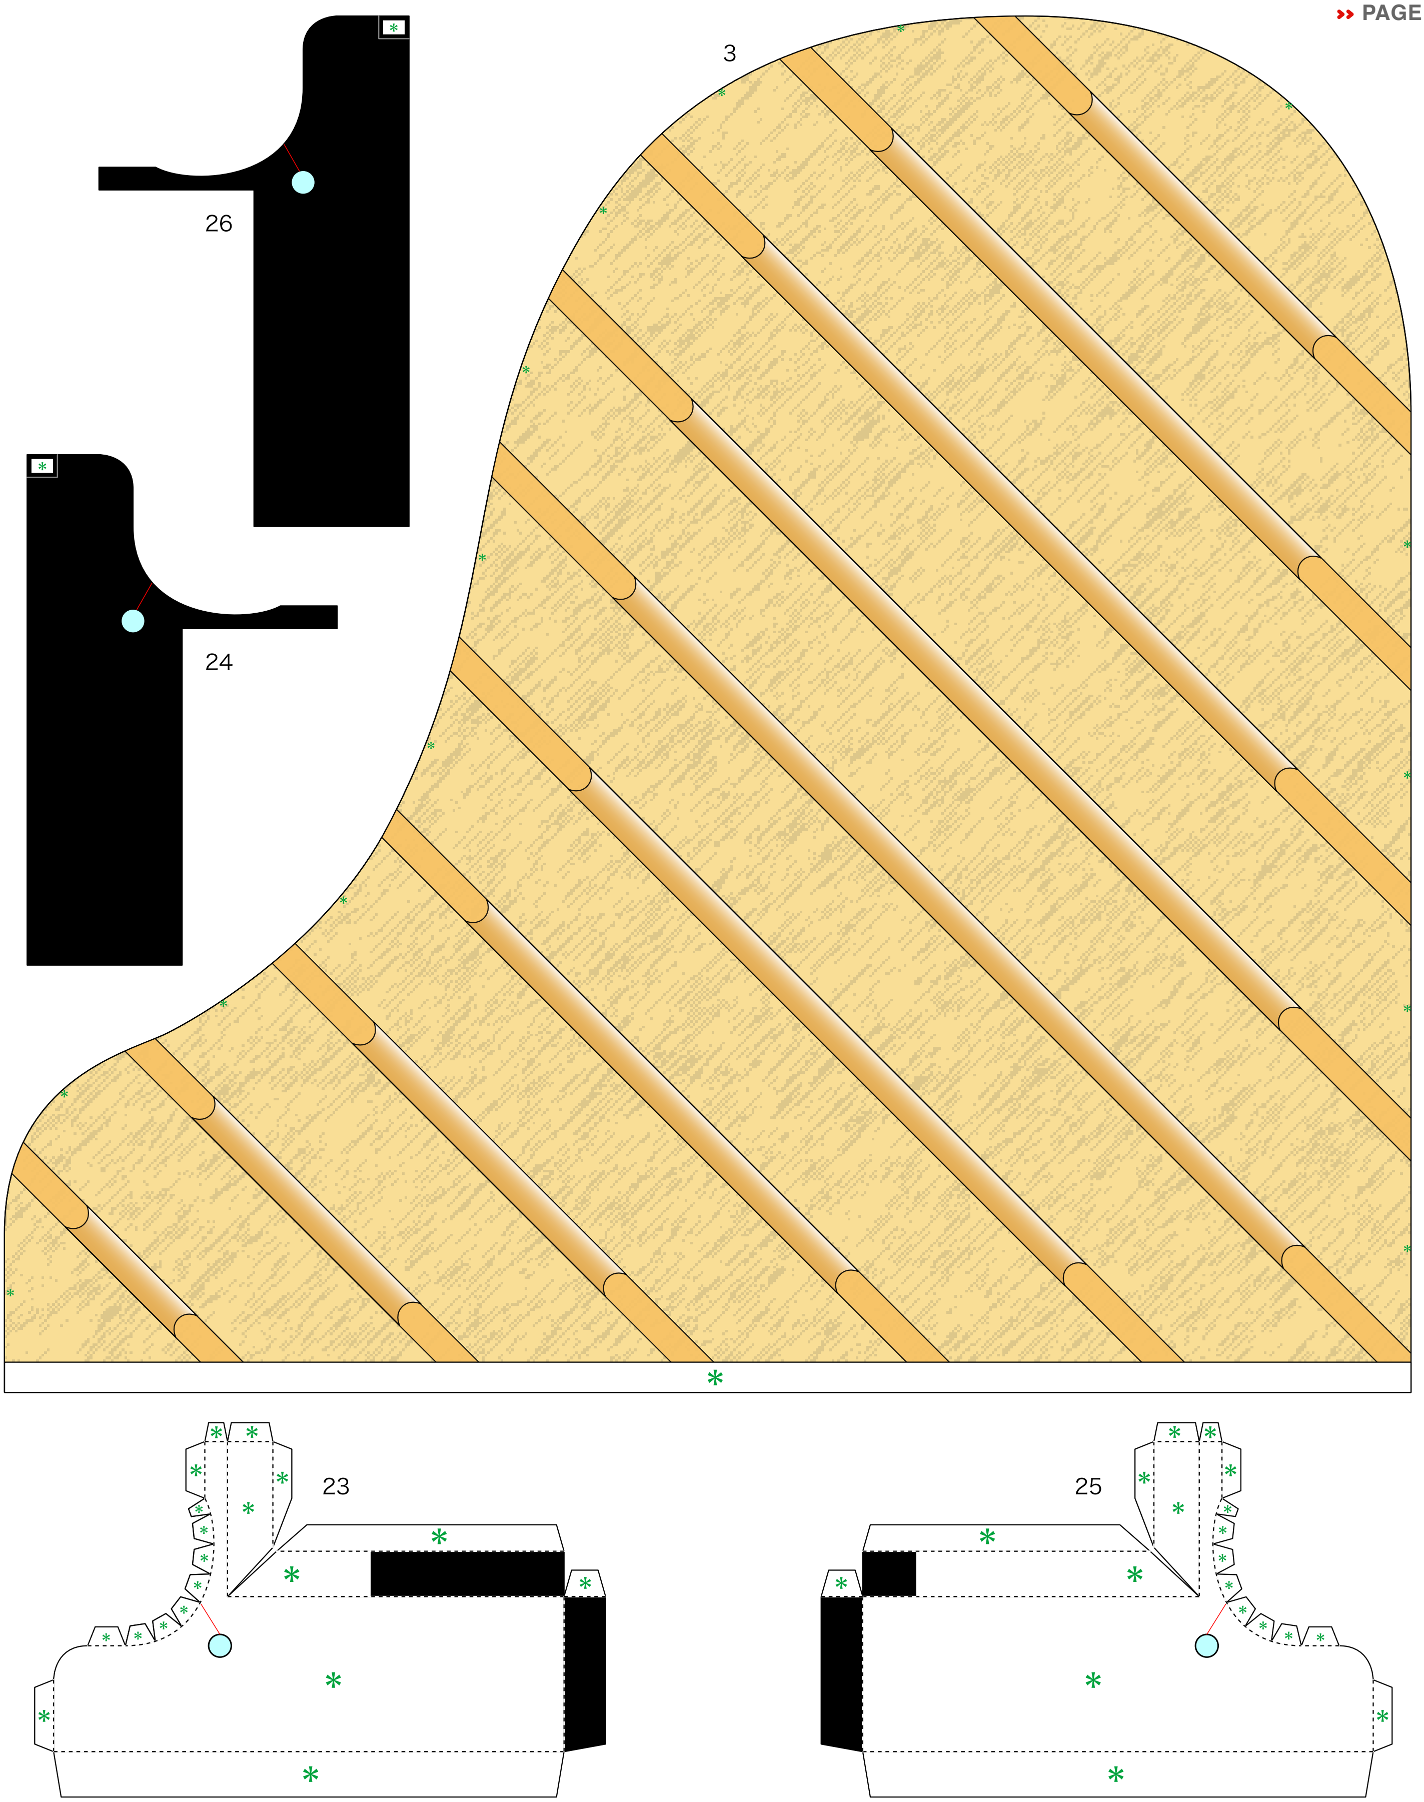

Parts sheet [Pattern] : Twenty-five A4 sheets

No. of Parts: 236

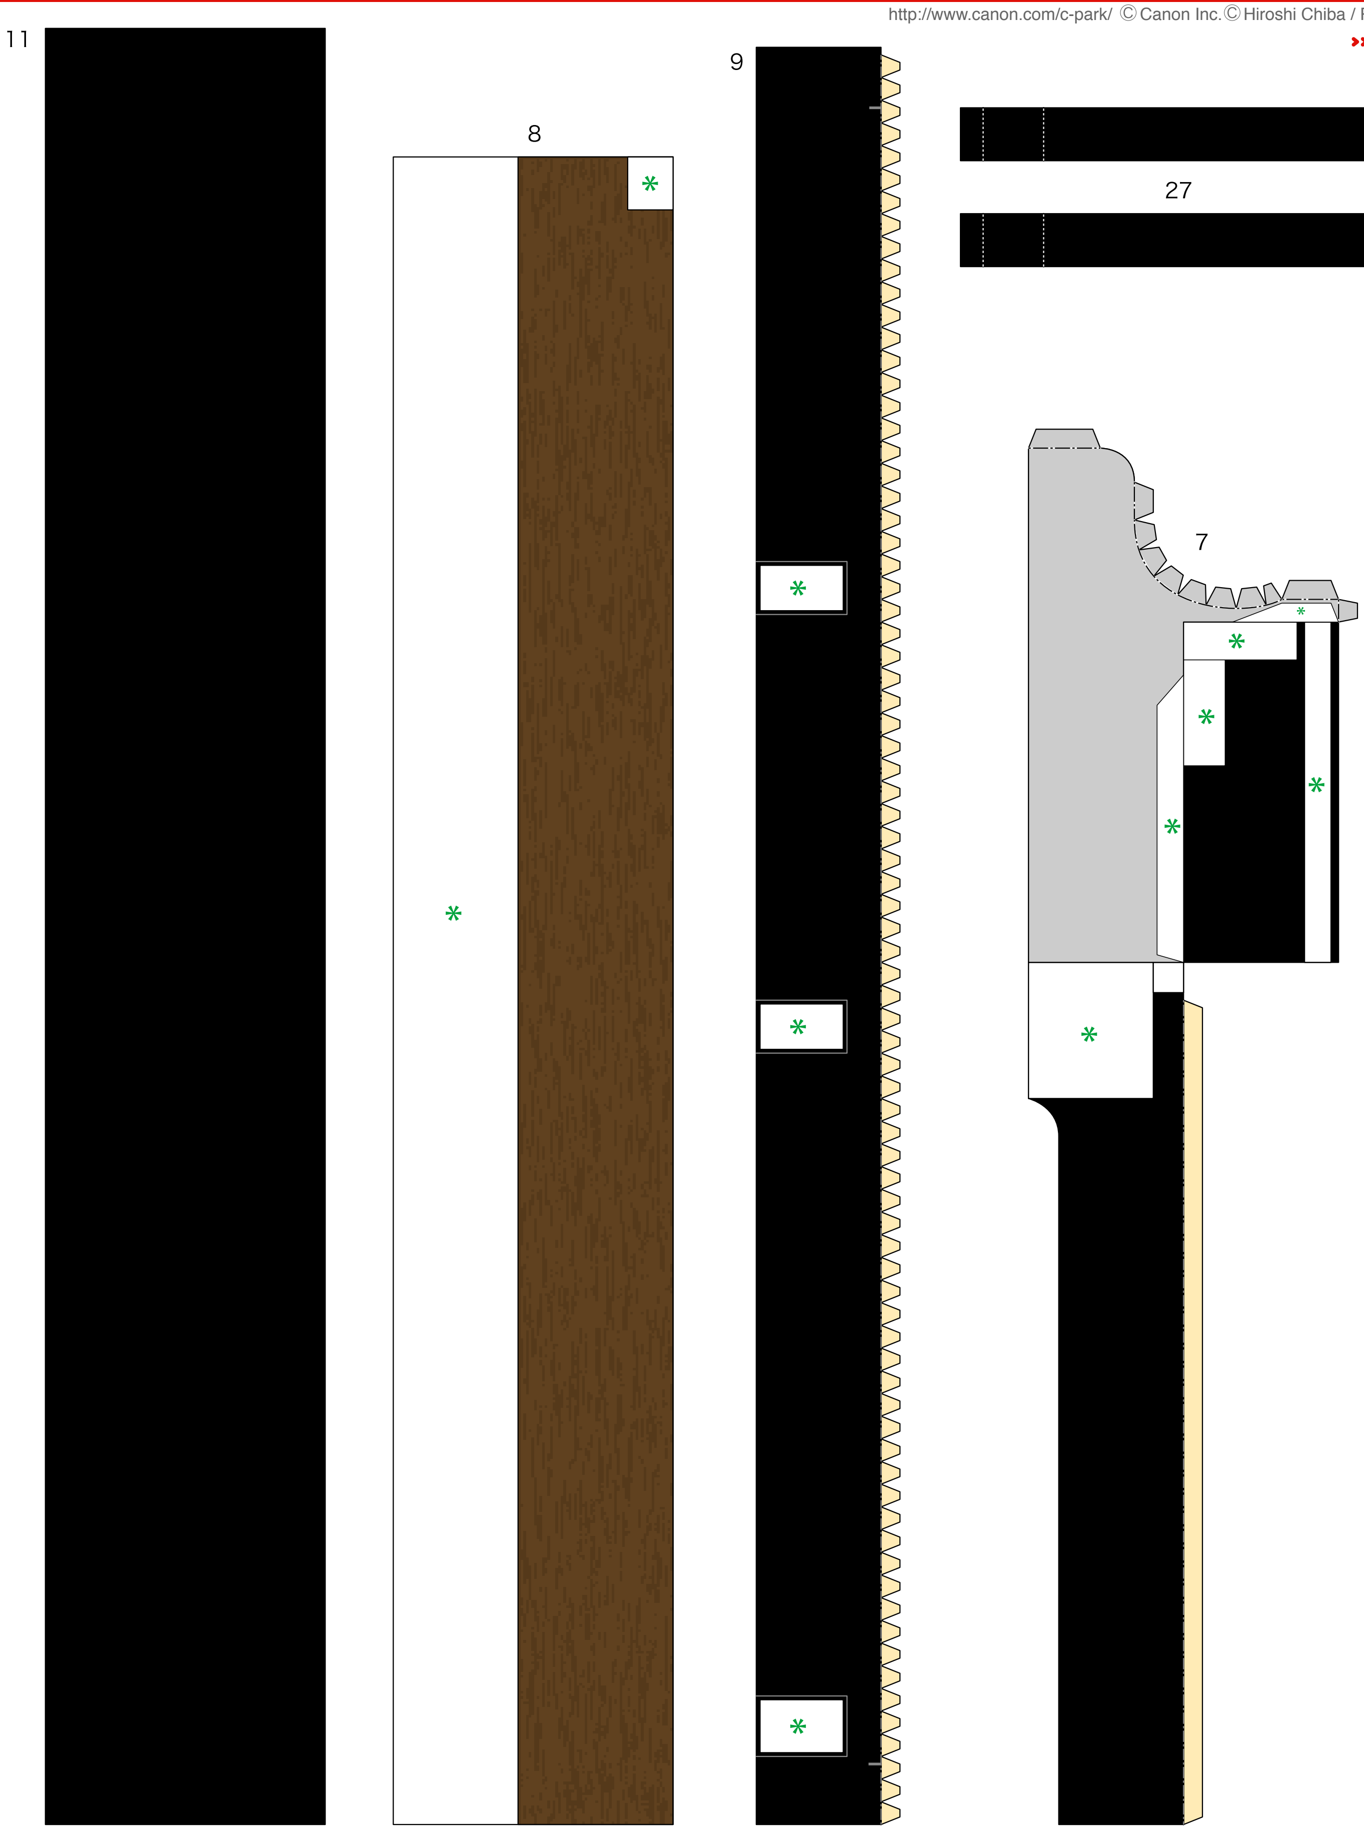

When assembling the parts, be sure to carefully read the "Assembly Instructions" along with the parts sheet.
This model was designed for Papercraft and may differ from the original in some respects.
